

Comment mesurer son tour de doigt ?

Plusieurs méthodes sont possibles.

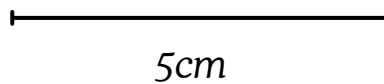

1 / Si vous disposez déjà d'une bague : le baguier

Imprimez ce document en **taille A4**.

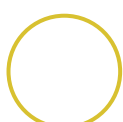

Munissez-vous de votre bague, et disposez-la sur le baguier. Comparez votre bague avec les différentes tailles présentes, jusqu'à ce que le **diamètre intérieur** corresponde.

Si vous hésitez entre deux tailles, je vous conseille de prendre la plus grande.

Pour être sûr que le baguier est à l'échelle, vérifiez que le **témoin** de 5cm **mesure bien 5cm** une fois celui-ci imprimé.
